The Vehicle must be further than 200 miles away from the nearest DMV Inspection Lane to Qualify

Application for an Out-Of-State Inspection to renew a Delaware Registered Vehicle

*This completed application, **Emission and/or OBD II printout readings, applicable fees, and a copy of your valid Delaware insurance card** must be returned to the Delaware Division of Motor Vehicles. Please mail all documents to: Division of Motor Vehicles, Correspondence Section, P.O. Box 698, Dover, Delaware 19903.

Dear Valued Customer:

The Delaware Division of Motor Vehicles requires vehicles to be inspected for SAFETY and EMISSIONS for an out-of-state renewal. Take your vehicle and DMV Form 210(a), to a repair facility or state operated inspection lane (if applicable) at your out-of-state location for inspection. Ensure ALL items are completed on the form including the inspector's signature, contact information, and printed name.

All vehicles registered in the State of Delaware must have valid liability insurance coverage for the vehicle, listing your Delaware address. Please provide a copy of your insurance card with the application. The Division will mail your new registration card and renewal sticker to your current out-of-state location.

ON BOARD DIAGNOSTICS (OBD II)

OBD II/Malfunction Indicator Light (MIL) testing is required for 1996 and newer vehicles. On Board Diagnostics is a complex computer system installed in 1996 and newer cars and light trucks. All power train diagnostic trouble codes fail Delaware inspection as well as an inoperable malfunction indicator light. Rejection due to readiness monitors not being set to a ready status will also fail Delaware inspection.

***NOTE: Attach OBD II test results to this form**

1. After making the DLC connection, the technician shall perform the Key On, Engine Off (KOEO) test to determine if the Malfunction Indicator Light (MIL) is properly functioning. If the MIL is not illuminated in the KOEO, the vehicle FAILS.
2. The technician shall start the vehicle, performing a Key On Engine Running (KOER) test.
3. The technician collects data from the computer of the vehicle. During the test, The Diagnostic Trouble Codes (DTC) and readiness indicators (if any) are obtained.
4. The technician turns the vehicle off and disconnects the DLC connector.

For vehicles that fail for computer not-ready on test:

- The customer should be told that the vehicle has failed for OBD not-ready. If the vehicle has been repaired or a battery replaced, they need to complete a drive cycle to ensure the vehicle is ready to test.

KOEO - MIL SHOULD BE ILLUMINATED

MIL ON

MIL OFF

KOER - MIL SHOULD NOT BE ILLUMINATED

MIL ON

MIL OFF

Diagnostic Trouble Codes (DTC), List any DTC's:

**Application for an Out-Of-State Inspection to renew a Delaware Registered Vehicle****Readiness Monitor Status:** Ready, Not Ready or Unsupported

1996 – 2000 model year vehicles may have 2 monitors not ready and pass, 2001 and newer vehicles are allowed only 1 monitor not ready. Please note any not ready monitors.

Comments:

I certify under penalty of perjury that the statement herein and the information provided on DMV Forms 210(a) is true and correct to the best of my knowledge, information, and belief. I certify that all equipment was inspected or tested and found in good/safe working order. If any item was not in good or safe working order it was documented above as a fail or unsafe condition and the customer will not be able to renew their registration until the item or test passes. I've attached any test result print outs if available.
