DOVER, DELAWARE 19903**

TITLE: **Gender Designation Changes on Driver Licenses and Identification Cards**

PURPOSE: This procedure establishes new standards for changing a gender designation on a driver license or identification card by providing the means for a person to change his/her gender designation without that person having undergone gender reassignment surgery. These procedures are in alignment with the U.S. Department of State's requirements for changing a gender designation on a U.S. passport as well as the majority of other U.S. jurisdiction driver license and identification card issuance agencies.

1.0 Customer Responsibilities

1.1 The customer must obtain Form MV2020 - Request for Gender Change on Driver License/Identification Card. Form MV2020 can be obtained at any DMV location or on the DMV website under "Forms and Manuals".

1.1.1 The customer is not required to have completed gender reassignment surgery. Instead, Section C must be completed by a medical or social service provider licensed in the United States certifying the customer's gender is either male or female.

1.1.2 Once the form is completed, the customer must visit any DMV location with the completed application.

1.1.3 Once a DMV representative verifies the information on Form MV2020 the gender designation on the customer's driver license or identification card may be processed.

NOTE: Form MV2020 will not be processed via mail or on line.

1.2 If additional changes need to be made to the customer's record such as a name change, the customer must present all necessary and typical documentation needed for the change.
